About Me

Developer with 2 years of study and practical experience, currently seeking my first opportunity as Junior, Trainee, or Intern. I am in a career transition and eager to apply my skills in a professional environment.

Skills

Proficient in JavaScript, TypeScript, Node.js with Express, React.js, HTML, CSS, PostgreSQL, MongoDB, and Docker. Experienced in building RESTful APIs, version control with Git, and using tools like Postman and Insomnia. Basic knowledge of testing with Jest and continuously improving in best practices and automated testing. Strong logical reasoning, proactive attitude, and intermediate English with advanced technical reading skills.

Experience

Stock Replenisher – Nagumo

São José dos Campos, Brazil | 2014 – Present

Responsible for stock organization, product replenishment, and customer service. Developed skills such as discipline, teamwork, and result orientation — qualities I bring to my transition into the tech field.

Technical Support Services

2022 – Present

Provide technical support services, assisting in troubleshooting, customer service, and basic system maintenance, applying clear communication and solution-focused approaches.

Personal Project

Currently developing a full system for a pizzeria using Node.js, Express, PostgreSQL, and Next.js. The project includes authentication, protected routes, and CRUD operations. I use Docker for development environment management and GitHub for version control. This work has helped me consolidate my knowledge of modern technologies and best practices, simulating real work environment challenges.

Education

Analysis and Systems Development – UNIP

January 2020 – January 2022

IT Technician – SENAC

January 2017 – January 2019
